

Dkt. No.: OP-093000201

REMARKS

Claims 1 and 4-10 are pending in this application. The Examiner has rejected claims 1-5 under 35 U.S.C. 103(a) as being unpatentable over Oikawa et al. (US 2004/0070949) and claims 6-9 in view of Felcman et al. (US 5754396).

First of all, Applicant wants to indicate there should be originally ten claims pending in this application. In response to Examiner's rejections, Applicant has cancelled claims 2 and 3 and amended claims 1, 4, 7 and 8.

In the amended claim 1, Applicant specifically limits the first access unit 2 being a hard drive 22 to be located inside the case 1 at an allocation space 16 which occupies an upper portion of the receiving space 14. The hard drive 22 is no more stacked beneath the second access unit 4 as in conventional. Therefore, Applicant's invention provides the heat dissipation channel between the second access unit 4 and the motherboard 3 by changing an allocation of a first access unit 2. Oikawa discloses a computer system with the HDD 6, FDD 7 and CD-ROM 8 stacked together to be mounted to the front side of the housing 1. Neither Oikawa nor Felcman teach or suggest the limitations in Applicant's amended claim 1.

Accordingly, Applicant respectfully traverses the Examiner's rejections.

That is, the amended claim 1 should be patentable over Oikawa, and presented claims 4-10 dependent on the amended claim 1 should be also allowed.
